

Plant Diagnostic Clinic Mid-Florida Research and Education Center March 2008

Date	ID Number	Plant	Photo	Diagnosis
3/6/2008	754	Oleander		<i>Xylella</i>
	753	Banana		<i>Myrothecium</i> and <i>Trichoderma</i> (secondary organism)
	753	Blueberry		Blueberry rust
	757	Mandevilla		<i>Fusarium</i> and <i>Pestalotia</i> isolated.
	758	Rheo		Possible Chilli Thrips damage

	759	Kalanchoe		No pathogen isolated. Possible physiological or environmental problem.
	760	Arboricola		No pathogen isolated.
3/13/2008	767	Jasmine		No pathogen isolated.
	762	Palm		<i>Colletotrichum</i> , possible causal or secondary
	766	Palm		No pathogen isolated, but bud rot should be treated with fungicidal drench. Leaf spots probably nutritional.

	764	Dianella		Possible cold injury
	764	Rhoeo		Processing
	770	Kalanchoe		Tarsonemid mite damage
	771	Plumbago		<i>Fusarium</i> and <i>Alternaria alternata</i> isolated.
	771	Indian Hawthorn		<i>Fusarium</i> and <i>Pythium</i> isolated.

	771	Viburnum odorotissimum		<i>Rhizoctonia</i> isolated from roots.
	771	Viburnum suspensum		Processing.
	769	Ficus		Processing
3/20/2008	763	Neanthebella palm		Processing
	794	Aloe		Processing

	768	Ficus		Processing
	768	Maranta		Processing
	768	Maranta		Processing
	774	Lipstick		Processing. Possible virus. Impatiens necrotic spot virus documented on lipstick plant.
	775	Syngonium		Processing

	775	Croton		Processing
	772	King Sago		Processing
	776	Spathoglottis		Processing
	776	Verishia		Processing
	776	Ludisia		Processing

	776	Spathoglottis
